Champion

The FLL Champion is determined by the evaluation of the following 4 categories: Robot Design, Teamwork, Research Presentation and Robot Game.

For the evaluation of the Robot Game only the best match from the three preliminary rounds counts. The team with the highest score will get 50 evaluation points automatically. The evaluation points of the other teams will be calculated by setting their score in proportion to the highest score reached.

The judges evaluate the teams on the basis of the FLL Evaluation Sheets. 50 points can be reached at the maximum. If none of the teams reaches the maximum score, the team with the highest points will be scored 50 evaluation points automatically. The evaluation points of the other teams will be calculated by setting their score in proportion to the highest score reached. That is how the ranking of the categories is determined.

The evaluation points calculated go directly into the scoring of the FLL Champion. A team can reach 200 evaluation points the max to become FLL Champion. Each category goes into the evaluation with a proportion of 25 %.
